

Sprint 1 Product Backlog

User Story 01

As a user (resident, municipal worker, or admin), I want to log in using a third-party identity provider so that I can securely access the system without creating a new password

User Story 02

As a visitor, I want to view a public dashboard so that I can understand what the platform does

User Story 03

As a logged-in user, I want to see a personalised landing page so that I know I am logged in and can proceed

User Story 04

As a worker, I want to log in to the portal using a third-party provider so that I can securely access the system

User Story 05

As an admin, I want to log in to the portal so that I can access administrative features

Sprint 2 Product Backlog

User Story 01

As a resident, I want to access the complaint submission feature from the main interface so that I can report a service delivery issue.

User Story 02

As a resident, I want to view a structured complaint form after initiating a complaint so that I can provide all required details.

User Story 03

As a resident, I want to view my previously submitted complaints so that I can monitor their status and progress.

User Story 04

As a resident, I want to select my ward using an interactive map during complaint submission so that my complaint is accurately associated with the correct location.

User Story 05

As a system administrator, I want API endpoints to enforce role-based access control using session authentication so that only authorised users can perform permitted actions.

User Story 06

As an admin, I want to access a centralised complaints dashboard so that I can view all submitted service delivery issues.

User Story 07

As an admin, I want to view detailed information for a selected complaint so that I can assess the issue accurately.

User Story 08

As an admin, I want to assign complaints to workers so that issues can be resolved efficiently.

User Story 09

As a user (guest or authenticated), I want to access the analytics feature so that I can view high-level system insights.

Sprint 3 Product Backlog

User Story 01: Assign Tasks to Workers

As an admin, I want to assign service delivery complaints to municipal workers through a task assignment form so that complaints can be addressed by the appropriate personnel.

User Story 02: Claim and Update Task Status

As a worker, I want to claim assigned tasks and update their progress status so that residents and administrators can track service delivery progress.

User Story 03: Submit Resident Feedback

As a resident, I want to provide feedback on a completed task through a feedback form so that I can evaluate the quality of municipal service delivery.

User Story 04: Log Complaint and Select Ward

As a resident, I want to log a service delivery complaint and select my ward on an interactive map so that my complaint is directed to the correct municipal area.

User Story 05: View Complaint Details on Map

As a user, I want to click on map pins to view complaint details so that I can understand issues reported in specific locations.

User Story 06: View Report Analytics Dashboard

As an admin, I want to view complaint analytics on my dashboard so that I can monitor service delivery performance and identify trends.

Sprint 4 Product Backlog

User Story 01: Prevent Self-Assignment of Resident Reports

As a system administrator, I want the system to prevent a resident who becomes a worker from claiming complaints they originally submitted so that conflicts of interest and fraudulent task completion are avoided.

User Story 02: Apply to Become a Worker

As a resident, I want to apply to become a municipal worker through my profile by selecting my service location on an interactive map so that I can be considered for worker responsibilities in my area.

User Story 03 : Verify Worker Applications

As an admin, I want to review and verify pending worker applications so that only approved residents are granted worker privileges.

User Story 04: Download Worker Task Analytics Report

As a worker, I want to download a PDF report containing my task analytics from my dashboard so that I can review, track, and share my work performance and completed service activities.

User Story 05: Access Interactive Map Tutorial

As a user, I want to access an interactive map tutorial from the main dashboard so that I can learn how to navigate the map and use its features effectively.

User Story 06: Automatically detect priority with ai

As a admin, I want to receive ai driven report priority estimates so that I can classify reports easier.
