

Sprint 1 Sprint Backlog

User Story 01

As a user (resident, municipal worker, or admin), I want to log in using a third-party identity provider so that I can securely access the system without creating a new password

Tasks

- Design and implement login page UI (5pts)
- Configure third-party authentication providers (5pts)
- Implement Discord authentication (3pts)
- Implement LinkedIn authentication (3pts)
- Implement Google authentication (3pts)
- Implement GitHub authentication (3pts)
- Implement Facebook authentication (3pts)

User Story 02

As a visitor, I want to view a public dashboard so that I can understand what the platform does

Tasks

- Design and implement public dashboard layout (3pts)
- Create dashboard navigation components (2pts)
- Add dashboard cards and interface elements (2pts)

User Story 03

As a logged-in user, I want to see a personalised landing page so that I know I am logged in and can proceed

Tasks

- Design and implement resident dashboard UI (3pts)
- Configure dashboard routing after login (2pts)
- Restrict resident dashboard access to authenticated users only (3pts)

Sprint 2 Sprint Backlog

User Story 01

As a resident, I want to access the complaint submission feature from the main interface so that I can report a service delivery issue.

Tasks

- Make complaint form (5pts)
- Implement image uploading (8pts)

User Story 02

As a resident, I want to view a structured complaint form after initiating a complaint so that I can provide all required details.

Tasks

- Build report/complaint table displaying submitted reports (5pts)
- Implement single report detail view/modal (3pts)

User Story 03

As a resident, I want to view my previously submitted complaints so that I can monitor their status and progress.

Tasks

- Build user profile page (3pts)
- Fetch and display user-specific reports (5pts)

User Story 04

As a resident, I want to select my ward using an interactive map during complaint submission so that my complaint is accurately associated with the correct location.

Tasks

- Add map to complaint form (5pts)
- Obtain location from map and use when submitting reports (5pts)
- Integrate map into complaint form (3pts)

User Story 05

As a system administrator, I want API endpoints to enforce role-based access control using session authentication so that only authorised users can perform permitted actions.

Tasks

- Implement session authentication system (5pts)
- Define user roles and permissions (3pts)

Sprint 3 Sprint Backlog

User Story 01 – Assign Tasks to Workers

As an admin, I want to assign service delivery complaints to municipal workers through a task assignment form so that complaints can be addressed by the appropriate personnel.

Tasks

- Make an admin dashboard (5pts)
- Assigning Reports to Workers (5pts)

User Story 02 – Claim and Update Task Status

As a worker, I want to claim assigned tasks and update their progress status so that residents and administrators can track service delivery progress.

Tasks

- Make a Worker Dashboard (5pts)
- Report status control (5pts)
- Status tracker on worker dashboard (3pts)
- Add Pending status to Reports (3pts)
- Add Report claim lock so reports can only be claimed by one worker (3pts)

User Story 03 – Submit Resident Feedback

As a resident, I want to provide feedback on a completed task through a feedback form so that I can evaluate the quality of municipal service delivery.

Tasks

- Create Feedback form (3pts)
- Display all feedback for report (2pts)
- Make component to display a single feedback (2pts)

User Story 04 – Log Complaint and Select Ward

As a resident, I want to log a service delivery complaint and select my ward on an interactive map so that my complaint is directed to the correct municipal area.

Tasks

- Actually put Location information in issues table (2pts)

Note: This had not been completed in sprint 2

User Story 05 – View Complaint Details on Map

As a user, I want to click on map pins to view complaint details so that I can understand issues reported in specific locations.

Tasks

- Display pins for issues on the map (2pts)
- Move map modal to main page and remove swiper (1pts)

User Story 06 – View Report Analytics Dashboard

As an admin, I want to view complaint analytics on my dashboard so that I can monitor service delivery performance and identify trends.

Tasks:

- KPI Cards (3pts)
- Display graph and percentages (3pts)
- Export pdf/csv (8pts)
- Workers Analytics Page (5pts)
- Admin dashboard worker analytics (2pts)

Notes: had not been completed in sprint 2

Sprint 4 Sprint backlog

User Story 01 – Prevent Self-Assignment of Resident Reports

As a system administrator, I want the system to prevent a resident who becomes a worker from claiming complaints they originally submitted so that conflicts of interest and fraudulent task completion are avoided.

Tasks

- validate report ownership before assignment/claiming logic (3pts)
- Enforce worker claim rules in backend logic (5pts)

User Story 02 – Apply to Become a Worker

As a resident, I want to apply to become a municipal worker through my profile by selecting my service location on an interactive map so that I can be considered for worker responsibilities in my area.

Tasks

- Build worker application form which uses map to get municipality (3pts)
- Store application data for admin review (2pts)

User Story 03 – Verify worker Applications

As an admin, I want to review and verify pending worker applications so that only approved residents are granted worker privileges.

Tasks

- Build verification management interface (3pts)
- Add approval/rejection workflow (5pts)

User Story 04 – Download Worker Task Analytics Report

As a worker, I want to download a PDF report containing my task analytics so that I can track and share my performance.

Tasks

- Generate worker analytics data (4pts)
- Implement export functionality (PDF) (4pts)
- Format report output for download (summary + graphs) (4pts)

User Story 05 – Access Interactive Map Tutorial

As a user, I want to access an interactive map tutorial so that I can learn how to use the system map features.

Tasks

- Create help/tutorial section in dashboard (5pts)
